CADENCE BASED IN DUBAI UAE A LEADING LEISURE BUSINESS

Play is an essential element of a child's development and contributes toward the improvement of important milestones such as refining motor skills, dexterity, cognitive function, and promotes healthy mental and physical wellbeing. Furthermore, recent years have demonstrated the importance of developing venues which are family immersive, which is why our venues are designed to meet the needs of the whole family so your customers can spend their valuable leisure time, together as family.

If you are looking for an expert, commercial play equipment supplier with over 20 years' experience to help you develop a successful indoor playground, soft play venue, trampoline park, sensory environment, parkour or ninja warrior course, Climbing Walls, Stainless Steel Slides, Inflatables, Ropes Courses etc., then contact our team today!

INDOOR PLAYGROUND

Indoor Playgrounds were developed in the mid 1980's as a place for young children to develop their physical and motor skills through play. The concept was simply to create a multi-level structure to allow children to express themselves through play in a safe and fun environment.

The notion of Indoor Playground began its journey at a reasonable pace and started to gain popularity in the 1990's. Since then the demand for both users and venues increased exponentially as awareness increased, and end users began to recognise the important role indoor playgrounds provide in the wellbeing of children.

TRAMPOLINE PARK

Trampoline Park venues were traditionally a series of interconnected trampoline beds which allow users to jump from one bed to another. The trampoline park concept started to gain popularity in the UAE early in 2015. CADENCE commenced supplying and installing trampoline parks in 2015 recognizing the rise in popularity throughout the UAE. From the very first installation we did in 2015, we identified the need to introduce a blended product mix to engage users and encourage repeat visits, and with great success, every park we have built since then has included some new type of feature through continuous research and development.

If you are looking for a new, innovative, cutting edge trampoline park facility then you are in the right hands!

CLIMBING WALL

A Climbing Wall is an artificially constructed wall with grips for hands and feet, usually used for indoor climbing, but sometimes located outdoors. Some are brick or wooden constructions, but on most modern walls, the material most often used is a thick multiplex board with holes drilled into it. Recently, manufactured steel and aluminum have also been used. The wall may have places to attach belay ropes, but may also be used to practice lead climbing or bouldering.

CADENCE are one of the leading suppliers of Climbing Walls and Bouldering Walls. Both are a fantastic addition to any indoor adventure park, Trampoline Park or leisure centre where there is a desire or need to expand adventure activities, offering a safe versatile attraction for all the family. Since the announcement that climbing will become an Olympic sport we have seen the interest in both fun climbing and bouldering increase drastically on a global scale. Airparx climbing installations make magnificent use of the floor space available, taking advantage of the height of buildings as well as wall area.

STAINLESS STEEL SLIDES

In the sector, children slides and dry slides made of stainless steel, we supply everything you need to have fun. From small standard playground units, through design slides to large event slides and slide paradises, with or without curves. They can be designed with supporting towers or for embankments. For us, whatever the type, two factors are of paramount importance: the safety of the guests and the comfort of the slide. The benefit to you: We look after the whole package– from the pre-planning, design, through to the construction, production and the fitted top-quality product.

What we can make for you:

- | Box slides
- | Single- and multi-lane box slides with waves
- | Open curved slides
- | Helical slides, open or as a closed tube
- | Tube slides, completely enclosed or as a panoramic tube slide with polycarbonate cover
- | Individual slides
- | Snake Farms

INFLATABLES

Over the years, we've built a reputation for supplying and maintaining a spectacular range of Inflatables of all shapes and sizes, from bouncy castles to inflatable shelters, from road arches to football pitch surrounds, from shoot out games to giant promotional items. We have devised creative solutions for a wide range of high-profile companies and individuals who have used our products to make an impact. Our highly skilled staff can design and supply inflatables to any specification and size to meet your needs. We use only the highest quality materials with every inflatable made from start to finish, conforming to all current Health and Safety Executive guidelines.

ROPES COURSE

Do you want to build your own High Ropes Course which can generate an interesting ROI and create value in your business ventures? Treat your guests to mid-air obstacles reminiscent of climbing through tree-tops, looking down on the crazy world below. CADENCE Indoor and Outdoor Ropes Courses install above your other attractions, packing fun and physical challenge into every inch of vertical space.
